

Mayco
Series 2000
Gloss

Translucent Finishes

Series 2000 glazes provide a tough, durable and craze resistant surface. The non-toxic formulation is ideal for schools, nursing homes and institutional use. Series 2000 is made without the addition of lead. Series 2000's non-flowing characteristics are great for majolica, glaze butting, antiquing, sponging, spattering or almost any other ceramics technique. Series 2000 glazes have a wide range of colors and finishes: translucent, opaque, matte and speckled.

- Apply to properly fired shelf cone 04 bisque with Oval Mop brush for general purposes; a Flat Glaze brush works better on embossed or highly detailed pieces.
- Fire to shelf cone 06.
- Non-toxic
- Dinnerware safe
- Can be high fired up to shelf cone 6.
- Most Luster compatible. Check individual jar for compatibility.
