Natural Clear Brushing	Clear Soft Matte Brushing	Clearly-the-Best Dipping	Natural Clear Dipping
<p>S-2101 is a brush on non-toxic lead-free clear glaze. It is a general use clear glaze when specific safety concerns are needed. This glaze produces a clean clear surface. Some underglaze colors may not be as bright as the fired color chart samples due to the nature of the glaze. Non-Toxic. Dinnerware safe. Luster compatible</p>	<p>Perfect for those preferring a non-toxic, transparent, soft clear satin finish. Does not run or flow during firing. This matte glaze is excellent for use over underglaze decoration. Slow firing cycles are strongly recommended. Non-Toxic. Dinnerware Safe. Luster compatible.</p>	<p>SC-209 is an improved non-toxic dipping glaze that gives a very clear glossy finish. This glaze does not milk any Stroke & Coat® colors during firing – even purples turn out bright and vibrant! This glaze requires a thin sheeting of glaze in the dipping process. Non-Toxic. Dinnerware Safe. Luster compatible.</p>	<p>S-2000 is the dipping version of the Series 2000 glazes. This glaze is non-toxic, lead-free and complies with ASTM guidelines. This glaze is great when working on large production of utilitarian items or in schools and institutions where health concerns matter. This glaze can affect the colors SC-13 and SC-33. Non-Toxic. Dinnerware Safe. Luster compatible.</p>
